

The program will display advertising of your choice during time between invoices. You can set the images or videos to be shown, in what order, and how long to display them. Sell advertising to other local businesses, or make ads for in-store promotions to draw attention to items and increase sales!

- **Show Related Items**

You may set a message to show when a specific item is rung out, and the picture set up within inventory will display in the lower right-hand corner of the screen. You can use this to remind customers to buy a strategy guide or an accessory with a purchase!

- **Customizable Colors and Logos**

Show your store logo and customize the screen to fit with your store's colors!
